

PROCEEDINGS OF THE ROYAL ENTOMOLOGICAL SOCIETY OF LONDON

SERIES C. JOURNAL OF MEETINGS

VOLUME 10.

No. 11, 1946.

Report of the Council, 1945.

The momentous year that has just drawn to a close brings also to an end a chapter in the Society's history which has not been without its difficulties. The Society may, however, justly congratulate itself upon the manner in which throughout the years of war it has continued to serve the Fellows without interruption, by the issue of its publications, the holding of regular meetings and the use of the Library. Though no further war damage was suffered by the Society's premises in 1945, other difficulties, due to the continued absence of the Registrar, and the absence of his assistant throughout the greater part of the year owing to illness, have placed a greater strain upon the administration of the Society's affairs than in any previous year. These troubles having now been overcome, the Society should be able to look forward with confidence to the future, though it will do so with more comfort when its windows have been replaced and other damage repaired.

The upward trend in attendance at General Meetings recorded in 1944 has shown a further marked improvement, the average attendance of Fellows and visitors having risen from 49 in 1944 to the almost pre-war figure of 69 in 1945. The increase is only partly explained by the full attendance at a meeting held jointly with the Royal Meteorological Society.

Much of the detailed business of the Society has, as hitherto, been conducted by the Finance Committee under the Chairmanship of Mr. Francis Hemming and the Publication and Library Committee under the Chairmanship of Dr. W. J. Hall, for whose activities the Council is very grateful.

The Committee for the Protection of British Insects, which has now been brought into line with the Society's other Committees, cannot report any considerable activity. The drought and late frosts at Wood Walton Fen killed off so many larvae of *Lycaena dispar* that it was feared the species might not survive. However, a fair number of butterflies eventually appeared, though not enough to provide the short series hitherto presented annually to the Natural History Museum. In Cornwall they have to report the lapse of the lease of land where *Maculinea orion* occurred, owing to a change of ownership. The Report of the Nature Reserves Investigation Committee, to which this Committee contributed much information, has now been published and is before the National Parks Committee set up by Government.

As a result of the Joint Meeting with the Royal Meteorological Society held on 20th June, 1945, a joint committee of the two Societies was set up to give expression to the resolution passed at the Meeting. The recommendations of this joint committee are already before the Council. The Committee on

Generic Nomenclature, owing to pressure of other work on its members, has not met, but some progress has been made with manuscripts in hand. During the year Council also received the reports of Sub-Committees set up to consider the tabulation of the special entomological interests of Fellows, and the form and nature of the General Meetings; due to lack of staff it has not yet been possible to give effect to these recommendations. Council has also lent its support to the formation of a Biological Council representative of the Societies concerned with the biological sciences and having as its main objective the establishment of closer liaison between these Societies.

With the exception of one small collection of books still at Wray Castle, the Library has now been brought back from safe keeping in the country, and is freely available again. The great care taken of the books during their absence in the hands of 23 individual Fellows, societies and institutions, who accepted custody of them is reflected by the fact that none has suffered damage, a result on which all parties concerned well merit congratulation, and for which the Council formally record their grateful thanks. During the year the Library has continued to be freely used, but both the number of Fellows borrowing books 397 (440¹) and the number of books borrowed 705 (740) show a slight decline from the very high figures for 1944. To the National Central Library 11 (14) books were also lent during the year.

The ending of hostilities has enabled touch to be regained with continental entomologists and societies, and with Fellows long cut off from contact. Visits paid by the Registrar to various European countries have also helped to re-establish these links.

The Society's premises have continued to be used as the Publication Office of the International Commission on Zoological Nomenclature, and as the offices of the Society for the Bibliography of Natural History. On two occasions the Meeting Room was lent to the Royal Meteorological Society, whose own premises were damaged.

The Eltringham microscope was lent on 2nd May, 1945, to a student in Dr. C. B. Williams' department at Rothamsted Experimental Station, under the usual conditions.

The standard of the Society's publications has been maintained during the year in the face of increasing difficulty in the supply of material, the increased cost of printing and particularly the delays due to the printer's labour shortage.

The volume of the *Transactions* for 1945 (volume 95) contains 8 (9) papers, of which 5 deal with Diptera, 2 with Hymenoptera and 1 with Orthoptera. In addition a number of papers are in an advanced state of printing and will appear as volume 96 early in 1946.

Very welcome assistance has again been received from the Royal Society through whom £250 was received from the Rockefeller Gift in aid of Scientific Publications and £330 from the Government Grant. The Wilkinson Bequest of £200 was also expended during the year.

The *Proceedings* were again continued, albeit with certain difficulty, in 3 series, as follows :—

Series A. General Entomology. Volume 20 consists of 127 pages and contains 22 papers.

Series B. Taxonomic Entomology. Volume 14 consists of 154 pages and contains 32 papers.

¹ The numbers in brackets throughout the Report indicate the corresponding figures for the previous year.

Series C. Journal of Meetings. A part of *Series C* was sent to each Fellow in advance of meetings and a complete copy of the volume will be distributed with the last part.

During the year the death of 5 Honorary Fellows : Dr. Ignacio Bolivar, Professor Semenov Tian-Shanskij, Professor A. Lameere, Dr. Paul Marchal, Dr. W. Lundbeck; 1, Special Life Fellow, E. C. Bedwell; and of 9 (14) Fellows has been reported : A. J. Rose, H. D. Smart, T. A. Lofthouse, H. E. Page, F. D. Coote, H. M. Pendlebury, F. S. Russell, R. A. R. Priske, M. D. Barnes.

The following 3 (4) Fellows have resigned : C. B. Church, A. E. Welch, C. M. Dammers.

The following 7 (3) have been removed from the List of Fellows in accordance with the Bye-Laws, Chapter XVI, Section 3 : A. E. A. Hudson, H. C. James, R. Kaulback, D. Manson, H. A. Moonsawmy, F. J. Reed, T. L. Scott.

During the year 3 Special Life Fellows, Dr. K. Jordan, F.R.S., Dr. S. A. Neave, C.M.G., O.B.E., and Mr. Hugh Main, and 62 (54) Ordinary Fellows have been elected, of whom 55 fulfilled their obligations.

As stated last year, the Council decided to retain on the List of Fellows the names of certain Fellows who were more than two years in arrears with their subscriptions because of the impossibility of communicating with them. With the end of the war it was decided that those who had not paid the outstanding subscription should be removed from the list as laid down in the Bye-Laws. After the removal of these names the Fellowship at 31st December consisted of 4 Honorary Fellows, 12 special Life Fellows and 707 Ordinary Fellows, a total of 723, which is not only an increase on the previous year, but the highest figure to which it has ever attained.

Treasurer's Report.

Mr. A. Welti said :—

In presenting my fourth annual financial statement, may I be allowed a flight of fancy? These being the accounts for 1945 some of my friends will perhaps be thinking of some reference to the ubiquitous Bath Whites, my wings covered with "cheques" or even of my posing as a Camberwell Beauty! The metamorphosis of an Honorary Treasurer, however, makes a better comparison with one of the small Psychid moths. These little black-coated fellows have grubs which hurry and bustle around for nearly a twelve-month, travelling hither and thither (fortunately for them they require no coupons for socks), they live on austerity fare and wherever they go, they carry their little sacs—I might say attaché cases—with them, spinning and gathering moss wherever they go. Then when the great day comes, they emerge and flutter around, busying themselves with their business for one brief hour. Almost in like manner, after a year's toil, I now emerge and I lay my "golden egg," the financial statement of our society, on the table before you for your scrutiny and approval.

The balance £59 7s. 7d. this year is again on the Credit side and provision has been made for some of the contingencies of the future. Whilst this is satisfactory, it is, of course, impossible to provide for every eventuality. These last years, the actual financing has been relatively easy, as we have been saving our Registrar's salary whilst he has been away on Government duty. Now, as he has returned to his duties here, there will be an immediate increase

in our expenditure. There are other impending expenses. As you will all realise this whole large building requires renovation, both internally and externally. Unfortunately, owing to war conditions, nothing has been done for some years and nothing can be done at the moment. One can but hope that things may soon become easier and that then we may be granted a licence to do the very necessary repairs and decorations. There are some self-evident improvements required, which will cost a lot of money and in spite of having tried to build up reserve funds over a series of years, these seem small and inadequate in the light of to-day's greatly increased costs.

The simple truth is that, like so many other institutions, one day we too may be forced by the stress of times to call upon our Fellows for an increase in their annual subscriptions.

In the first months of Peace, we have been able to reassemble most of our Library and this has meant a considerable expenditure, but this was foreseen. Speaking of the Library, there is a matter dear to the hearts of your Honorary Officers and that is the issue of a new Library Catalogue. What an achievement this would be and how welcome to those of our Fellows residing far away. In 1944 a fund for this purpose was inaugurated and this year a further sum has been allocated. Such a Catalogue will naturally cost a small fortune and funds only accumulate slowly.

Turning to the Accounts, subscriptions reflect our increased membership, admission fees are about £34 above last year's figure, which indicates a healthy growth, and this is gratifying. Sales of publications are satisfactorily maintained, whilst expenditure and provision for expenditure on Publications amounts to £2053 1s. 9d., of which £783 3s. were donations which are gratefully acknowledged. The Monograph of *Apanteles* by the late Lieut. Wilkinson, R.N.V.R., duly appeared during this last year and the necessary outlay was found.

Thanks to two journeys by our Registrar, the one to France, the other to Germany, our society has acquired a fairly comprehensive series of the Publications of those two countries which were issued during the war period. Having provided for such purchases, our accounts have not been embarrassed by the expenditure.

The Staff Provident Fund, which is again recommended to Fellows, has received a further small contribution.

The Accounts now before you will, it is hoped, give satisfaction. The Audit has this year again been carried out by our friends, Messrs. W. B. Keen & Co.

Throughout the year the Finance Committee has been most willing to be of assistance and I am sorry it will lose its Chairman, Mr. Francis Hemming, who has now served his term of office. I am sure his advice and assistance will be readily available should the call arise. It has been a happy two years and all of the Committee have spared no effort in serving the interests of the Society.

May I again this year express my thanks to all the Staff for the help they have extended to me during this last and most difficult year of the war. Let us hope the coming year will prove less arduous and that we may all soon feel that we are returning to a more normal state of affairs in an era of Peace and Progress.

May Science and biological research from now on be the Servants of Mankind and never again be used as slaves for destructive purposes.

THE ROYAL ENTOMOLOGICAL SOCIETY OF LONDON.

THE PRESIDENT'S REMARKS

WHEN my predecessor spoke to you a year ago our expectations were at the peak, and hopes were high. Now I speak to you under the same physical conditions as regards our immediate environment, for which we have good cause to be thankful, but under a condition of world affairs further advanced towards the far-off ideal than we had dared to hope.

This is no place for a discussion of world affairs so I will proceed at once with the proper business of the President at the annual meeting. This has been, on the whole, an uneventful year of steady productive work, and the society has been nobly served by its Secretary and Treasurer, so that my duties have been light.

In some respects the society is like a government department—Presidents come and go, like political leaders, and for a little while seem to exercise authority, and perhaps occasionally produce an idea, but the work is done by the more permanent officers who lead the newcomers gently by the hand, show them what they have to do, and (sometimes) where they “get off.”

We are fortunate in having our Registrar back on full-time duty, our clerical assistant restored to us in good health, and our library undamaged and back in its right place.

I propose to discuss the effect of the war upon our activities, but my first duty is to the memory of those who have passed from us. The war took from us the following fellows who died or were reported missing on active service: D. S. WILKINSON (1941), P. H. SIMON (missing 1942) and G. A. BISSETT (1944). Also during the year under review M. D. BARNES and H. M. PENDLEBURY, who are alluded to later.

Before proceeding with obituary remarks upon those Fellows whose deaths in the past year we deplore, I would like to pay some tribute to one who died previously, but of whom nothing has been said. The Reverend K. St. Aubyn ROGERS spent his life in the service of the Church Missionary Society in East Africa, and died in 1943, as a Canon of Mombasa in Kenya Colony, where he had so actively laboured. He was elected a Fellow of our society in 1908, and in the *Transactions* for that year showed himself to be not only a very active collector but also a keen student of the living insect, paying especial attention to mimicry and geographical variations among butterflies. His activities were mainly at Rabai, a little distance from Mombasa, whence he sent large collections to the Hope Department of the Oxford University Museum, and corresponded with Sir Edward Poulton. At that time not very much was known of the subjects which Poulton, aided by such collectors as Rogers, so developed that the study of mimicry among African butterflies has been further advanced than among most, and Oxford possesses a vast storehouse of material for study. A number of new species and forms were fittingly named after this assiduous collector. The last specimens which he sent to Oxford were five living pupae of *Papilio dardanus* which, as recorded in our *Proceedings* for 1939 ((A) 14 : 35), travelled by air to England and all produced perfect butterflies, the first living *dardanus* to be seen in England.

During the year under review there have died, or we have had the first tidings of the passing of, 5 Honorary Fellows, one Special Life Fellow, and 9 Ordinary Fellows.

Ignacio BOLIVAR, who was elected an Honorary Fellow in 1905, came of an ancient and noble Spanish family. He was born in 1850, and died on

20th November, 1944, in Mexico, whither he had not long emigrated from his native land.

At the age of 20 he was already known as an ardent entomologist and in 1871 was the first vice-secretary of the newly founded Sociedad Española de Historia Natural. He joined the staff of the Natural History Museum at Madrid in 1875, and subsequently became its director: in 1877 he was appointed to a chair in Madrid University and lectured in Zoology until 1922.

Bolívar contributed greatly to knowledge of the Iberian fauna, so rich in Orthoptera, and he became an acknowledged expert in the taxonomy of that order; during his life he described over two hundred genera and about a thousand species. In 1925 he founded the journal *Eos*.

His outlook, however, was not confined to taxonomy, for he was greatly interested in the living organism and was actively instrumental in founding the marine biological station at Santander and an alpine biological station in the Guadarrama Mountains. He was a man of great vitality and personal charm and was honoured by many biological societies. For these facts I have drawn from *Nature* of 21st July, 1945.

Auguste Alfred Lucien Gaston LAMEERE was born in 1864: information has only recently been received from Belgium that he died on 6th May 1942.

He was a taxonomist of high reputation, especially in connection with Coleoptera, which formed the subject of one of his earliest studies. The PRIONIDAE were special favourites and he wrote a number of papers on that group, including a work on those of Tropical Africa: he also contributed the section on CERAMBYCIDAE to the *Genera Insectorum*. Secondary sexual characters and their evolution; the origin of insect societies; the phylogeny of Arthropoda; and the evolution of Ephemeroptera, Orthoptera, Lepidoptera, Coleoptera and Hemiptera were among the subjects upon which he wrote. He also devoted some time to Palaeontology and wrote upon fossils of Commeny and their bearing on the past history of metamorphosis. In later years he published a voluminous *Précis de Zoologie*. He contributed sections on Insects for the *Manuel de la faune de Belgique*.

His last paper, in 1940, was on the evolution of Hemiptera.

During his long and studious life he had held high academic position in the University of Brussels and received many honours and distinctions. He was elected Honorary Fellow of our society in 1914.

William LUNDBECK, who died in 1941, was well known as the author of the work *Diptera Danica*, in English, of which seven parts have been published, the last in 1927. With Heikriksen he wrote upon the terrestrial Arthropoda of Greenland, and he also published on the insects and spiders of the Faeroe Islands. He was elected an Honorary Fellow in 1937.

Paul MARCHAL was born in 1862 and died in March 1942; he was elected Honorary Fellow of our society in 1918. He studied medicine and took a doctorate in that subject as well as in science. His earliest researches were upon Crustacea, but sundry papers upon wasps in 1893 showed his interest in the living animal rather than in morphology. From 1894 he was in charge of the Station Entomologique de Paris until he retired from it in 1933, and became known as a practical entomologist, and as a naturalist in the widest sense of the word. He laid stress upon the futility of ignoring the living animal when attempting to define the status of subspecies etc., from museum specimens only; thus, he considered that such a "species" as *Trichogramma evanescens* comprises a number of biotypes separable by their reactions to their hosts. His very numerous publications comprised diverse aspects of

entomology but the economic aspect was well to the fore. CECIDOMYIDAE, COCCIDAE, and APHIDIDAE especially received attention and he did much to clear away difficulties resulting from uncertainty as to identifications.

Marchal will be especially remembered for his work upon the embryology of parasitic Hymenoptera, leading to the discovery of polyembryony: his last scientific publication concerned *Trichogramma*. He was not only a student, and a skilled experimentalist in the laboratory, but a very practical man who took an active part in investigating and applying measures for the destruction of pests by chemical and biological means. He was largely instrumental in founding the *Annales des Epiphyties*, of which he was the mainstay until his death.

Not only our society, but many others conferred honours upon him. For this summary I have drawn upon the obituary in the 1942 *Annales de la Société entomologique de France* 111: 149-165.

Andrei Petrovich SEMENOV-TIAN-SHANSKI was born in 1886 and is reported to have died in Leningrad during the blockade in 1942. He was elected to Honorary Fellowship of our society in 1913. He graduated at St. Petersburg University in 1889, and was on the scientific staff of the Zoological Museum of the Academy of Sciences from 1890-96: with ample means of his own he was independent, and able to devote himself to science. A great taxonomist, he was chiefly known for his work on Coleoptera, but he also wrote upon Hymenoptera and Dermaptera. His descriptions were written in classical Latin of a style all too rare, and were based upon large series of specimens. Thus he came to be interested in the larger problems of variation and geographical distribution, and was an acknowledged expert upon the zoogeography of Central Asia, the mountains of which his father had explored. In 1936 he produced a zoogeographical map of the Palaearctic region, based upon the distribution of Coleoptera. He was President of the Russian Entomological Society for most of his life and founder of the *Revue Russe d'Entomologie* but his activities were by no means purely entomological. Nature in its widest sense attracted him and he wrote upon exploration, protection of wild life, and organisation of museums. The Russian Naval League made him President in 1914.

Many societies conferred honours upon him, and he did much to make Russian entomology known to the world. A fuller notice from which these facts are drawn will be found in *Nature* for 26th January, 1946.

Ernest Charles BEDWELL died in April 1945 at the age of 69. He was educated at North Walsham Grammar School, and became a surveyor. From his youth he was an ardent collector, commencing with Lepidoptera but soon turning to Coleoptera, of which he made a magnificent collection, paying special attention to *Sternoxia*. He was later known as a devotee of Hemiptera, and obtained all but about thirty of the British Heteroptera, one of them new to science. He was extremely generous with gifts of rarities to others, and presented many to the Hope Department's collections at Oxford. He was elected to our society in 1899, was vice-president in 1922, and served on the council for three periods. As a qualified surveyor he rendered great service to the society and was honoured by being elected a Special Life Fellow in 1940. His fine collections were bequeathed to the Norwich Museum. (See 1945, *Entomologist* 78: 128.)

Maurice D. BARNES was elected a Fellow in 1942. He was reported missing, presumed dead, on 2nd July 1945, while engaged in mine-sweeping operations in the North Atlantic.

Herbert E. PAGE was born in 1868: he passed away on the 3rd March 1945. Trained as a schoolmaster, he early came into contact with J. W. Tutt on the London School Board, and in 1888 helped him initiate the *Entomologist's Record* which came into existence in 1890. He will be chiefly remembered by entomologists for his long conduct of that journal, at first with Tutt and later with the help of a Committee, until he handed it over in 1925 to a panel of editors. He was elected a Fellow of our society in 1895 and served on the Council in 1918-1920. Very retiring in disposition, he was known personally to few, for he rarely attended a meeting and wrote but little.

Henry Maurice PENDLEBURY, who died on 22nd Sept. 1945, was born in 1893: he was educated at Shrewsbury School and the Royal College of Science in London. He served through the first great war from 1914-18 and reached the rank of Captain. In 1921 he was appointed systematic entomologist, F.M.S., at the Selangor Museum, where he remained throughout his career, becoming Director of Museums in 1938. He was elected a Fellow of our society in 1921.

Pendlebury was a shrewd observer and keen collector of insects, his chief interest being in Rhopalocera: with A. S. Corbet he wrote *The Butterflies of the Malay Peninsula* (1943). He built up large collections by trips in Malaysia and visited all the larger islands. His expedition to Mount Kina Balu in 1929 with F. N. Chasen was the most prolific in results of any made to that mountain. A charming and companionable man, he knew the natives and got on with them very well. In December 1941, before leaving the museum at Kuala Lumpur at the time of the Japanese onrush, Pendlebury removed the library and collections of insects to the Department of Agriculture: the museum was destroyed in 1945. He was captured by the Japanese in Singapore and although he survived three years and a half of internment he died in hospital at Bangalore only a week after liberation.

Arthur J. ROSE, who died 16th January 1945, at the age of 86, was elected a Fellow of our society in 1886, but resigned in 1916: he joined again in 1941. All his life he was a keen naturalist and had served on a commission to investigate complaints concerning the seal fishery in Behring Sea. As an entomologist he was a stimulating companion in the field with his acute powers of observation, and long experience. He had himself taken the "Black-veined White" during the days when it could be collected in England. He took an active part in founding the Streatham and Norbury Entomological and Natural History Society.

H. Douglas SMART was born in 1880, and from his father inherited a love of entomology, and followed him into medical practice. He was elected a Fellow of our society in 1916. After a long period of general medical practice he specialised in ophthalmic surgery, and finally retired in 1945 to a smaller practice at Bognor Regis, where he died while collecting near his house. He was known as an enthusiastic breeder of moths, especially *Angeronia prunaria*, of which he obtained striking modifications. He left a large collection of bred families with careful notes. (See 1945, *Entomologist* 78: 192.)

Other Fellows whose loss we deplore are F. D. COOTE, elected in 1921; T. A. LOFTHOUSE, elected in 1903; Richard A. R. PRISKE, elected in 1904; and Frank S. RUSSELL, elected in 1922.

This is not the occasion for a Presidential Address. A suggestion that was made to me by a former president seemed to me worth putting into effect, and I propose to give a short account of how our society fared during the war.

As regards physical damage we were extremely fortunate and no serious harm was inflicted. During 1940-1941 windows were broken and one heavy bomb burst within a hundred yards of us. On three occasions in 1944 damage occurred but not of a serious nature.

I need not dwell upon the anxiety that was felt for our fine library : you have heard the council's report and know that, thanks to the elaborate arrangements made for its care, nothing was lost. The first steps were taken after the crisis in September, 1938, when arrangements were made for the transport of irreplaceable items to safe places, and for others to be stored in a specially prepared cellar. In 1939 all unique and irreplaceable works were removed to Aberystwyth and other rarities to the ground floor strong room. Intensified air attacks in 1940 caused the evacuation of rare periodicals to Gloucestershire ; separate works were sent to Hampshire ; shelf lists were filmed and then sent to Aberystwyth. In 1941 the despatch of books into the country on a large scale was continued.

As regards its meetings, the society can take pride in the fact that not a single scheduled meeting was abandoned. In 1939 it was decided to omit the October and November meetings on account of the "black-out," and only 10 meetings were held : in 1940, 9 meetings were held, all in the afternoon, and similarly in 1941 and 1942. A joint meeting with the Genetical Society was held in 1942 and was attended by 102 persons : in the following year 9 meetings were held, one of which, in common with the Ecological Society, was attended by 80 persons. Nine meetings were also held in 1944, and 10 in 1945, of which one was in conjunction with the Royal Meteorological Society : 76 persons attended it.

The work of the society was greatly hampered when its Registrar, Mr. Griffin, was transferred to the Home Office (Intelligence Branch) in July 1942. He returned to part-time duty in July 1945, and is now back on full duty.

His absence meant a great deal more work for the clerical assistant, Miss Evans, who unfortunately fell ill in March 1945 : thanks to the kind help of Miss Yvonne Angel and Mrs. F. R. Langstadt, the serious gap was partly filled.

Sergeant Webb, the caretaker-housekeeper, left in July 1941 and was replaced by Sergeant Campbell, who brought his wife to look after us most efficiently.

This has been a very trying time for our Secretary and Treasurer, harassed with the difficulties of official duties and business of their own, as well as the cares of the society and the extra work resulting from depletion of staff. I think that both have felt that 1945 has been the most difficult year of all, and, for their sake, let us rejoice that it is over.

The chief justification for a society such as ours being its capacity to increase knowledge, we will now see what can be said about its publications during the war years. I think there is considerable reason for feeling that we have justified ourselves.

During each of the first three years of the war the *Transactions* contained more pages than in 1938, and in 1940 there were actually more plates. The shortage of paper began to tell in 1942 when the number of pages fell to 63.6% of the figure for the previous year which, incidentally, was slightly greater than in the year before the war. By 1944 the number of pages had fallen to approximately half of that for 1941 and 1938. But we may find comfort in the remarkable fact that in 1944 no less than 85 plates were published, a number only surpassed as long ago as 1927. In 1945 the number of pages

rose again, though still less than in 1941 and previous years. The *Proceedings* suffered also and in 1939 Series A showed an immediate drop by 16·3% of the number of pages, and a further descent to the lowest point in 1943 when the number was only 62·9% of the pre-war figure. However, there was a rise of 27·7% next year.

Series B tells a similar story, save that the number of pages continued to fall after 1943, reaching its lowest level in 1944.

Regarding the Ordinary Fellows, it is seen that 1941 was the worst year, for both the average number of attendances at meetings and the new elections were the lowest. The number of Fellows on the roll was smallest in 1940 although that figure was as much as 96·7% of the pre-war figure: there was a very slight increase in 1941. However, the vitality of the society was shown in 1942 by a rise in the number of Fellows to a higher figure than in 1938, and in 1944 it reached, for the first time since 1937, a total of 700. It has risen again during the present year. The new elections of course fell markedly during the war, there being a drop of 50% in 1939 and the lowest figure was reached in 1941, showing a drop of 63·1% from the pre-war figure. However, the figures rose steadily until, in 1944, the elections were 117·4% of the 1938 number, and there was a further rise in 1945 of 14·8% to the highest figure recorded during the last 20 years. Not only by election of new Fellows has the society proved its endurance of the war. The disadvantages of scattering the library proved to be more apparent than real as a glance at the column "Books borrowed" in Table 1 will show. This shows by the letters "C.L." the

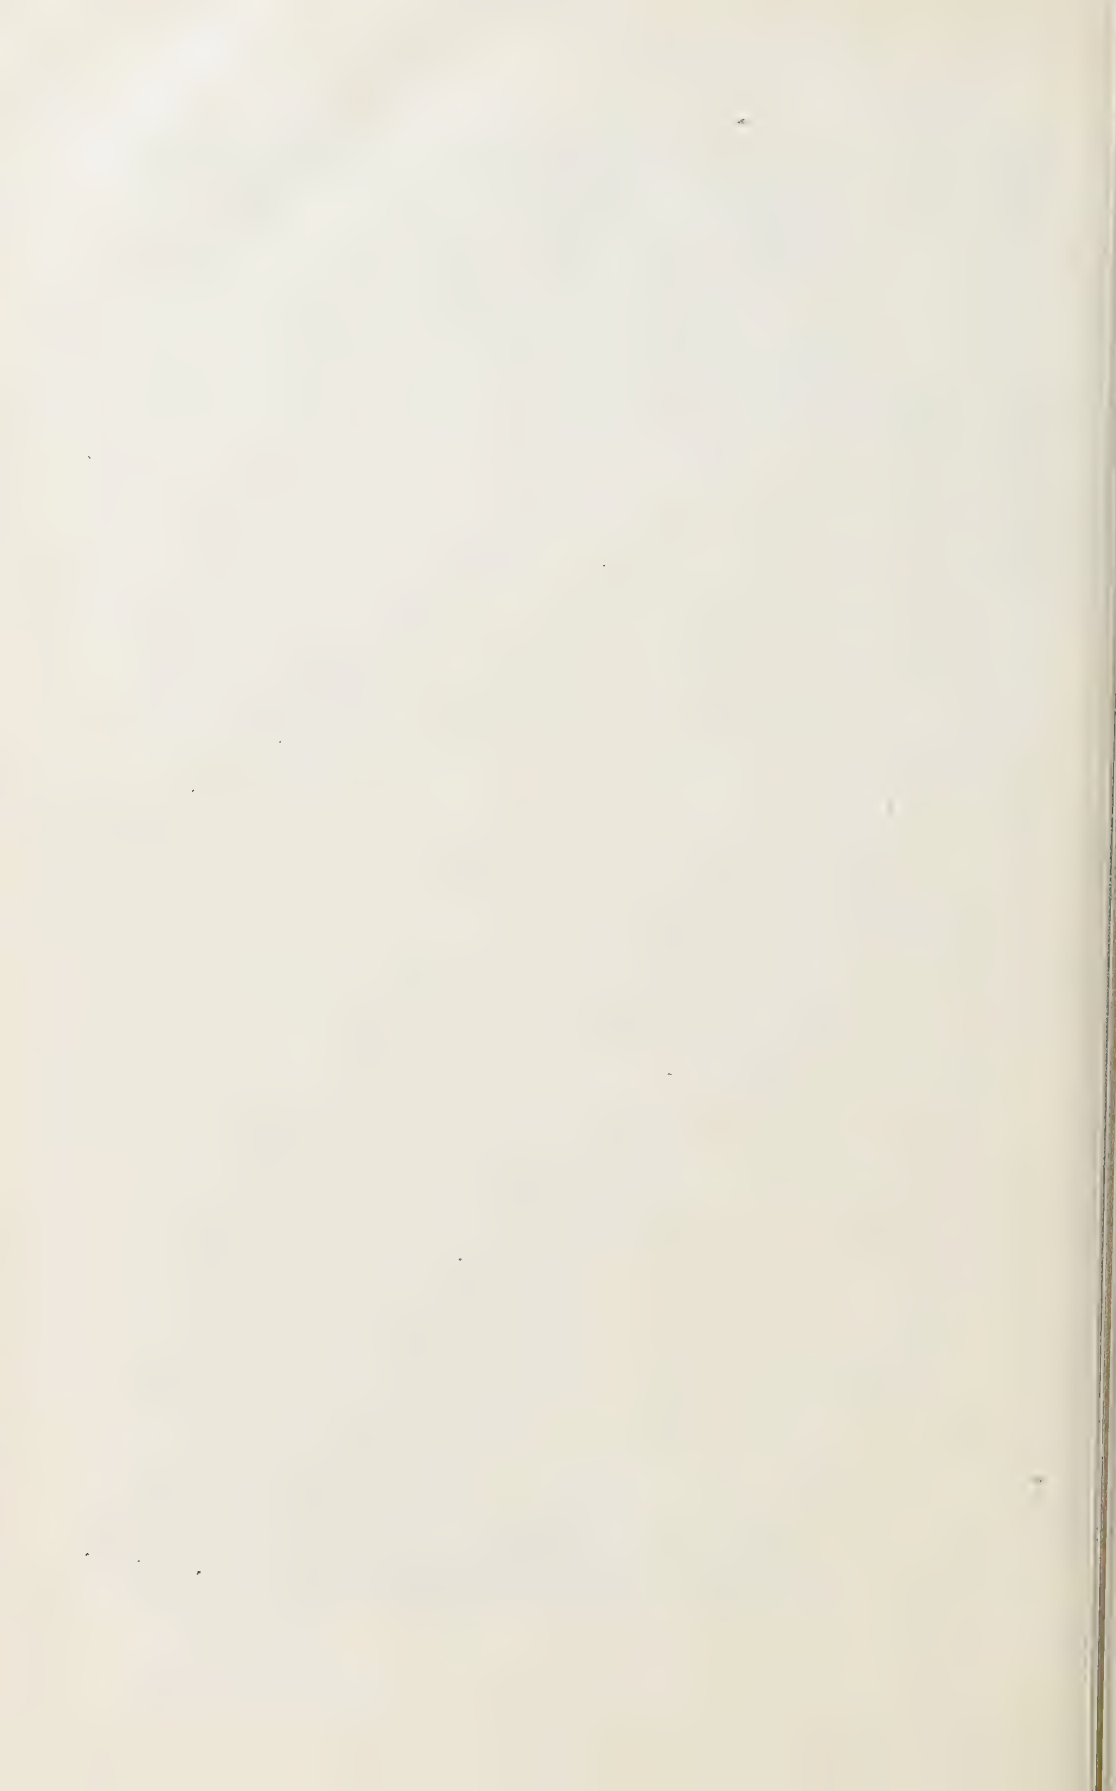

TABLE 1.

	Average attendance	Ordinary Fellows	New elections	Borrowers of books	Books borrowed (C.L. = lent to Central Library)	Transactions			Proc. (A)		Proc. (B)	
						Papers	Pages	Plates	Papers	Pages	Papers	Pages
1938	74	687	46	449	988 +50 C.L.	23	708	33	37	178	48	282
1939	58	692	23	443	879 +60 C.L.	20	835	15	47	149	53	251
1940	46	664	21	365	881 +63 C.L.	23	841	39	19	124	43	218
1941	29	670	17	348	676 +12 C.L.	13	717	19	18	126	37	255
1942	37	696	20	382	641 +34 C.L.	7	456	4	34	141	28	187
1943	39	687	44	343	589 +11 C.L.	7	495	5	33	112	28	186
1944	49	700	54	440	740 +14 C.L.	9	355	85	26	143	33	150
1945	69	707	62	397	705 +11 C.L.	8	530	8	23	130	32	160

number of books also sent to the National Central Library for consultation. In 1940 the number borrowed was approximately the same as that for 1939, and was only 10·8% below the pre-war figure, while the number sent to the Central Library actually increased. There was a drop in 1941 to 68·4% of the pre-war

figure and in 1943, in spite of an improvement in attendance at meetings and in new elections, the number of books borrowed fell to its lowest level, viz. 59.6% of the pre-war figure. However, there was a rapid improvement in 1944, maintained, but not at quite the same high level, in 1945.

I think you will agree with me that this review of our war-time history, and the present state of the society gives us every reason for confidence in the year that is to come. I feel sure that with such a staff as we have we can be certain that our society will prosper, and, while thanking you for the honour you did me by electing me to the chair, I should like to assure you that during this second year I will do all that I can to make the meetings interesting and profitable.

LIST OF FELLOWS

OF THE

ROYAL ENTOMOLOGICAL SOCIETY OF LONDON.

HONORARY FELLOWS.

Date of
Election.

- 1915 ‡ HOWARD, Dr. L. O., *Ex-Chief, Bureau of Entomology, U.S. Dept. of Agriculture, Washington, D.C., U.S.A.*
- 1931 ‡ SILVESTRI, Prof. F., *R. Istituto Superiore Agraria, Portici, Naples, Italy.*
- 1937 SNODGRASS, R. E., *Bureau of Entomology, U.S. Dept. of Agriculture, Washington, D.C., U.S.A.*
- 1937 WEBER, Dr. Hermann, Ord. Professor für Zoologie und Vergleichende Anatomie, Direktor des Zoologischen Instituts und Museums der Universität, Münster i. Westf., *Aegidiistrasse 39, Münster i. Westf., Germany.*
-

SPECIAL LIFE FELLOWS.

Date of
Election.

- 1944 ‡ (1904) BLAIR, Kenneth G., D.Sc. (PRESIDENT, 1940-1; V.-PRES., 1942; COUNCIL, 1918-20, 1931-3, 1942), *Pentwyn, Freshwater, Isle of Wight.*
- 1926 (1891) FROHAWK, F. W., *Essendine, Cavendish-road, Sutton, Surrey.*
- 1944 ‡ (1912) IMMS, A. D., M.A., Sc.D., F.R.S. (PRESIDENT, 1936-7; V.-PRES., 1920, 1930, 1935, 1938; COUNCIL, 1919-21, 1930-2, 1935, 1938), *Faldenside, Tipton St. John's, nr. Sidmouth, Devon.*
- 1945 ‡ (1894) JORDAN, K., Ph.D., F.R.S. (PRESIDENT, 1929-30; V.-PRES., 1909, 1926, 1931, 1933; COUNCIL, 1909-11, 1924-26, 1931, 1933-35), *The Museum, Tring, Herts.*
- 1944 ‡ (1885) LLOYD, R. W. (V.-PRES., 1924, 1928, 1932, 1933; COUNCIL, 1900-3, 1923-5, 1928-30, 1932-4), I, 5, *Albany, Piccadilly, London, W. 1.*
- 1945 ‡ (1899) MAIN, Hugh, B.Sc., F.Z.S. (V.-PRES., 1941; COUNCIL, 1908-10, 1939-41), 9, *Woodside-road, Woodford Wells, Essex.*
- 1945 ‡ (1903) NEAVE, S. A., C.M.G., O.B.E., M.A., D.Sc., F.Z.S. (PRESIDENT, 1934-5; SECRETARY, 1919-33; V.-PRES., 1918, 1931, 1936; COUNCIL, 1916-18, 1936), *Imperial Institute of Entomology, 41, Queen's Gate, S.W. 7; Mill Green Park, Ingatestone, Essex.*
- 1926 (1890) NEWSTEAD, Prof. R., M.Sc., F.R.S., A.L.S., Hon. F.R.H.S., *St. Mary's Cottage, 67, Handbridge, Chester.*
- 1931 (1905) POWELL, H.,
- 1942 ‡ (1908) TALBOT, G., 31, *York-road, Woking, Surrey.*
- 1943 ‡ (1901) WATERHOUSE, G. A., D.Sc., B.E., *Australian Museum, College-street, Sydney, New South Wales, Australia.*
- 1933 ‡ (1906) WHEELER, The Rev. George, M.A., F.Z.S. (SECRETARY, 1911-21; V.-PRES., 1914; COUNCIL, 1921), *Ellesmere, Gratwicke-road, Worthing.*
-

FELLOWS.

(The names of those who have not yet paid either the Entrance Fee or the first year's subscription are not included.)

Marked * died during the year 1945.

Marked † have compounded for their Annual Subscriptions.

Marked ‡ have been formally admitted into the Society (to December 1945).

Date of
Election.

- 1913 ‡ ADAMS, B. G., *The Old Rectory, Swell, Fivehead, Somerset.*
 1945 ADAMS, C. V., F.Z.S., 19, *Halcyon-road, Swilly, Plymouth, Devon.*
 1938 ADAMS, P. C. G., *European Hospital, N'Kara, Northern Rhodesia.*
 1902 ‡ ADKIN, B. W., *Highfield, Pembury, Tunbridge Wells.*
 1943 ‡ AIRY-SHAW, H. K., B.A., *Royal Botanic Gardens, Kew, Surrey.*
 1921 ALEXANDER, Prof. C. P., *Fernald Hall, Massachusetts State College, Amherst, Mass., U.S.A.*
 1931 ALFIERI, Anastase, General Secretary and Curator of the Fouad 1st Entomological Society, *P.O. Box 430, Cairo, Egypt.*
 1938 ALFREY, J. I., *The Bombay Fire Insurance Association, 6, Rampart Rau Fort, Bombay, India.*
 1944 ‡ ALLAN, P. B. M., M.A., 4, *Windhill, Bishop's Stortford, Herts.*
 1943 ALLEN, Donald, F.R.P.S., 698, *Warwick-road, Solihull, Warwickshire.*
 1940 AMERY, J. W., *Ballamoar, Laxey, Isle of Man.*
 1919†‡ ANDREWES, Dr. C. H., F.R.S. (COUNCIL, 1945-), 34, *Ossulton Way, N. 2.*
 1910†‡ ANDREWES, H. E. (COUNCIL, 1920-2), 8, *North Grove, Highgate, London, N. 6.*
 1922 ‡ ANDREWES, H. L.
 1932 ‡ ANDREWS, E. A., M.A. (COUNCIL, 1943-), 2, *Abbey-gardens, St. John's Wood, N.W. 8.*
 1899 ‡ ANDREWS, Henry W. (COUNCIL, 1930-2), 6, *Footscray-road, Eltham, S.E. 9.*
 1908†‡ ANTRAM, Charles B., *Rivermead, Keynsham, nr. Bristol.*
 1913 ‡ ARMYTAGE, Edward O., *c/o The Westminster Bank, Ltd., 25, Sussex Place, S.W. 7.*
 1907 ‡ ARNOLD, G., O.B.E., D.Sc., A.R.C.S., F.R.S.S.A., *Corr. M. Amer. ent. Soc., F.Z.S., Box 240, Bulawayo, South Africa.*
 1899†‡ ARROW, G. J. (COUNCIL, 1905-7), 9, *Rossdale-road, Putney, S.W. 15, and British Museum (Natural History), Cromwell-road, S.W. 7.*
 1944 ARTHUR, D. R., M.Sc., *Advisory Research Dept. in Agricultural Zoology, University College, Cathays Park, Cardiff.*
 1942 ASHCROFT, E., F.R.H.S., 39, *Leyland-road, Penwortham, Preston, Lancs.*
 1921 ATKINSON, D. J., *c/o Messrs. Grindlay & Co., 54, Parliament-street, S.W. 1.*
 1928 ‡ AUBERTIN, Miss Daphne, M.Sc., F.L.S., *The Priory, Berwick St. John, Shaftesbury, Dorset.*
 1930-41, 1945 AUSTIN, M. D., *The Field Laboratory, Porters Farm, Gt. Brazsted, nr. Witham, Essex.*
 1945 ‡ AVERY, R. F., M.A., 3, *Panmuir-road, West Wimbledon, S.W. 20.*
 1913 AVINOFF, A., Director, *Carnegie Museum, Pittsburg, U.S.A.*

- 1904†† BAGNALL, Richard S., D.Sc., F.R.S.E., F.L.S., 9, *York-place, Edinburgh*, and 3, *St. Helens Terrace, Low Fell, Gateshead-on-Tyne*.
- 1909 † BAGWELL-PUREFOY, Capt. Edward, F.Z.S. (COUNCIL, 1930-2), *The Cottage, East Farleigh, Kent*.
- 1934 BAILEY, Lt.-Col. F. M., C.I.E., *Hill House, Northrepps, Cromer, Norfolk*.
- 1943 BAKER, D. B., 2nd Lieut., 21, *Quarry Park-road, Cheam, Surrey*.
- 1934 BAKER, F. T., *City and County Museum, Lincoln*.
- 1938 † BALFOUR-BROWNE, J. W. A. F., M.A., F.Z.S., *British Museum (Natural History), Cromwell-road, London, S.W. 7*.
- 1921 † BALFOUR-BROWNE, Prof. W. A. F., F.R.S.E., F.L.S., F.Z.S. (V.-PRES., 1934; COUNCIL, 1925-7, 1933-5), *Brocklehurst, Collin, Dumfries, N.B.*
- 1944 BALTER, R. S. D., 18, *Ferncroft Avenue, Hampstead, N.W. 3*.
- 1942 * BARNES, Maurice D.
- 1943 BARRATT, Peter R., 88, *Manley-road, Oldham, Lancs.*
- 1902 † BARRAUD, P. J., *The Cottage, Kyrchil-lane, Colehill, Wimborne, Dorset*.
- 1936 BARTHOLOMEUZ, Dr. G. F., *Office of Medical Entomologist, Torrington-square, Colombo, Ceylon*.
- 1935 BAUM, W. W., *Chilterns, 38, Wanlop-road, Syston, nr. Leicester*.
- 1908 BAYFORD, E. G., 16, *Rockingham-street, Barnsley*.
- 1912 † BAYNES, E. S. A., *Monkshatch Cottage, Compton, Guildford, Surrey*.
- 1945 BEAUFOY, S., B.Sc., A.M.I.E.E., F.R.P.S., 98, *Tuddenham-road, Ipswich, Suffolk*.
